Compare FusionAuth to Keycloak

FusionAuth and Keycloak share many features standard in modern customer identity and access management solutions: Secure registration and authentication, OAuth tokens and API key management, SSO, and MFA. They are also both free, and get contributions from an active user community.

However, unlike Keycloak, FusionAuth releases regular security and feature updates and patches. FusionAuth also has numerous support and hosting options for companies that need a platform they can rely on.

FusionAuth also installs on any server, anywhere in the world, for complete user data control. Use the chart below to compare our features and read more in our **API documentation**.

	Keycloak	FusionAuth
Free for unlimited users	✓	✓
Authentication for web & mobile applications	✓	✓
OAuth token & API key management	✓	✓
